

Web Accessibility Training

Learn how to achieve WCAG compliance throughout the writing, developing, designing, and testing phases of digital content.

Tailored Training for Your Entire Team:

Content Creation

Attendees do not need prior development experience, but general knowledge about adding content to websites is assumed.

- ✓ Two, 2-hour remote sessions
- ✓ Digital accessibility overview
- ✓ Providing text alternatives
- ✓ Making content relationships clear
- ✓ How to make PDFs and other documents accessible
- ✓ Tools for accessibility monitoring and reporting

Web Development

Attendees will need to be familiar with HTML, CSS, and JavaScript to understand the methods used throughout these sessions.

- ✓ Three, 2-hour remote sessions
- ✓ Keyboard accessibility
- ✓ Assistive technology compatibility
- ✓ Using proper color contrast
- ✓ User-centric forms
- ✓ Accessible Rich Internet Applications (ARIA)

All Accessibility Trainings Include:

Core concepts of WCAG

Learn the four core principles for creating accessible content throughout the writing, development, and testing phases.

Complementary audit

Get an accessibility audit of top-level pages and prioritized recommendations for fixing WCAG issues on your site.

Best practices for digital teams

Empower content editors and web developers with strategies and hands-on practice implementing accessibility.

Review of accessibility tools

Learn how to use and interpret automated accessibility scanning reports from free and low-cost compliance tools.

Training resources

Easy-to-follow documentation, video modules, and resources for accessible web publishing after training.

Post-training support

Up to 20 hours of ad hoc or follow-up consultation for questions or guidance on accessibility remediation.

Partnering to make the web a more inclusive & accessible place.
